Dear Tom,

You should have a copy of the map that we submitted to Ed Ginouves for our Sliver 1-2 notice. I have been asking to bond on only my claims, which I await your expedient calculation this week so that we can move forward. Was the map from Ed Ginouves sufficient to update the existing permit?

My hands are tied as to doing further reclamation work on the Independence Patent because it is private property and Mr. Truman has requested that I do not do any more work on his private property. Mr Truman had said to me that you had told him that you had accepted the work. I can not restrict or close public access to the other private patents in the area or to my mining claims (Sliver 1-2).

I am willing to go do more work this week on the Independence Patent if you can get in writing from Mr. Truman that it is OK with him.

Awaiting your reply soon

Dave, You still have Sliver 1-2 permit that is not bonded. Any reference to Sliver 1-2 is only related to the name of your permit S001/0035, not related to claim names. We will be sending you a letter shortly that will require a minimum bond to cover your remaining disturbance on BLM and private. You will have 30 days to place the minimum bond for the first acre naming both the Division and BLM or we will withdraw the permit and pursue enforcement action.

I would request you fill out a new Small Mine Application form and submit this to the Division since your existing permit from 1995 is inaccurate and not

0011

S/001/035

complete. We can not accept any revisions to this permit without corrections.  
By the way, you are welcome to change the name of your permit when you submit the new form. Any questions please contact me.

Attached is our reply to your inspection of the "Sliver 1-2 report",  
(which should actually be the Independence Patent reclamation report.)  
Please see letter.

Please add to the File. Thank you for your assistance.

Best Regards

Just so you know, the disturbances Dave identifies (the purple area and green polygons) inside the BLM lands on the Sliver 1/2 claims (the blue polygon on his map) is 0.5 acres
